Chad Koslovsky

React engineering | Connected customer experiences

Milliken, Colorado · chad@koslovsky.xyz

Senior Frontend Technical Lead - React & Integrations | Concentrix

01 PROFILE

Hands-on product engineer and technical lead connecting React and TypeScript interfaces with APIs, identity and the business workflows behind them. Client delivery spans marketplace applications, shared operational systems and production support, with an infrastructure background that keeps releases and recovery in view.

02 EXPERIENCE

Founder / Product Engineer / Systems Lead · Technomancy IT LLC | 2015-Present

Lead client products from discovery through React/TypeScript interfaces, APIs and production support. Build tenant-aware services and coordinate specialist contributions.

Product Engineering and IT (Long-Term Contract) · NuPrice | Client engagement within Technomancy IT | 2019-2021

Built and operated a marketplace application connecting pricing rules, accounts, subscriptions, billing and support. Owned the technical delivery throughout a long-term client engagement.

Senior Systems Engineer / Datacenter Architect · Front Range Internet Inc. | 2015-2020

Ran the NOC, modernized workloads into Docker and Kubernetes, and handled production escalations. Ran SOC 1/SOC 2 audits and kept engineering procedures clear through organizational change.

Systems / Software Engineer · Office Evolution | 2014-2015

Built SQL/MongoDB applications joining CRM, provisioning, onboarding and service operations across locations. Worked with the CEO and CIO to turn departmental handoffs into shared workflows.

Network & Systems Engineer · PlumChoice / Everon | 2012-2014

Engineered and supported business networks and endpoints for managed-service clients. Built diagnostic tooling and handled on-call issues directly with owners and users.

Infrastructure and Systems Focal · IBM | 2010-2012

Supported shared enterprise infrastructure and coordinated changes across application, vendor and business teams. Automated audit/backup workflows and managed virtualization labs.

03 SELECTED WORK

NuPrice | Marketplace-to-customer workflows · Long-term client engagement | 2019-2021

Built the client application connecting marketplace inputs and pricing rules with accounts, subscriptions, billing and embedded support. Owned delivery and ongoing technical operations.

Technomancy | Shared business services · Founder-built platform | In development

Building TypeScript/Next.js/PostgreSQL software joining support, CRM, scheduling and billing through tenant-aware services. Implemented versioned release and recovery-verification tooling.

Office Evolution | Integration across departments · Employment project | 2014-2015

Built centralized SQL/MongoDB applications joining CRM, provisioning, onboarding and service operations. Worked with company leadership to turn cross-team handoffs into explicit workflows.

04 CAPABILITIES

React and TypeScript; reusable customer-facing interfaces · Node.js, API integrations and tenant-aware services · OAuth/OIDC, access boundaries and connected business workflows · CI/CD, container delivery, monitoring and production troubleshooting · Client discovery, architecture decisions and cross-team delivery
